Letter from Leadership

2025 marked a year of deliberate growth for Common Psychology. We expanded our clinical team, opened new service lines to meet needs we were hearing about consistently from clients and partner organizations, and deepened our commitment to accessible, evidence-based mental health care across the Kathmandu Valley and beyond.

Service Highlights

This year we launched Trauma Counseling, incorporating EMDR and nervous-system regulation work into our clinical offerings. We also signed our first organizational wellness partnerships, bringing employee assistance programs and leadership training to workplaces across Nepal.

Looking Ahead

In 2026 we plan to expand our online therapy infrastructure, grow our child and adolescent programs, and continue building partnerships with schools and employers across the region.
